## IX. NEW BUSINESS

### 1. VEHICULAR CIRCULATION UPDATE NO. AD2005-5

**Jaime Rodriguez, Traffic Engineer**, presented Vehicular Circulation Update No. AD2005-5, a request by the Planning Commission to re-examine the circulation at the Calaveras Plaza Shopping Center.

**Commissioner Mohsin** noted that turning from Calaveras into the driveway, there is no sidewalk at the intersection and the streets are narrow and it also causes a backup of traffic. Mr. Rodriguez pointed out that a sidewalk could be installed on the west side and that when an improvement is required on the site, staff could try to have the property owner implement the sidewalk.

Commissioner Galang suggested putting a no stopping sign near the Kinko's area and also to put a sign after the bridge that there is another entrance into the Plaza.

Mr. Rodriguez noted that staff cannot require the property owner to do anything and can only make a recommendation to them.

Commissioner Galang asked if staff could trim the trees near Calaveras and Serra and extend the driveway into Calaveras Plaza. Mr. Rodriguez said that he would go out and take a look and see if it is something the property owner could do.

Mr. Rodriguez noted that it is Caltrans policy not to allow the City to put signage on a state route towards private development.

Commissioner Galang asked if staff studied how many cars make a right turn on Butler and then make a U-turn to East Calaveras during busy hours. Mr. Rodriguez replied No but said that as part of traffic retiming project staff collected data at all the intersections and will get turning moving counts for a total of seven days at the end of July.

Mr. Rodriguez said that traffic on Calaveras is a good sign because it shows that the economy is moving up.

Commissioner Galang asked if staff would recommend a street light on Butler and Mr. Rodriguez said no because it is very costly and the public would not support a traffic signal there.

**Commissioner Williams** said that before Mr. Rodriguez came on board, the Commission was requiring that the height of the fence behind Mr. Chows be fixed and the property owner at Calaveras Plaza fought very hard against the improvements. The only way staff can get a property owner to be responsive is when an applicant comes in but most applicants are not willing to fight with a property owner because they want to get a business license for their business.

Mr. Rodriguez noted that on the traffic side, traffic engineering had not provided a lot of responses to improvement projects in the past but now, they review every project that comes in and if they identify any safety improvement, they push it back to Planning to make sure that it is looked at and implemented.

Commissioner Williams noted that he has seen many issues with Calaveras Plaza about making enhancements to that area and the property owner not being open to suggestions. Mr. Rodriguez said it is a difficult situation and staff cannot legally make the property owner do anything. The only legal course the City can require improvements are if the existing property owner files a development application. Other than that the City can only recommend improvements.

Commissioner Mandal asked if any improvements were to be made at the Calaveras Plaza who would pay for it. Mr. Rodriguez said that the developer would have to pay for it.

**Commissioner Mandal** noted that the parking lot is very crowded and asked if parking spots can be eliminated. Mr. Fujimoto replied that the site is at their maximum capacity in regards to parking, so if they were to lose some parking spaces they would be parking deficient and staff has no legal right to require them to remove spaces.

Commissioner Mandal noted that the Commission wants the entryway to Calaveras Plaza to be enhanced. Mr. Rodriguez noted that now, staff recommends a new type of driveway for all new developments.

Commissioner Mandal said given the constraints, is there anything to do to alleviate the problem. Mr. Rodriguez said that the only that could be done would be to reconstruct the driveway and staff would make the recommendation to the state and see what they say.

**Vice Chair Garcia** said that he would make one recommendation to staff and that is to send a letter to the property owner and tell them they need to look at the whole situation and voluntarily make improvements.

**Commissioner Azevedo** asked staff that when the change was made from Citibank to Lee's Sandwiches, that it would have been a good idea to require the improvements then. Mr. Fujimoto said that during the time, the shopping center made improvements in regards to the Midtown Plan, however the intersection wasn't identified as an issue at that time.

Chair Lalwani noted that there were parking problems between Lee's sandwiches and the property owner and Mr. Fujimoto said that there have been improvements done during that time.

Mr. Rodriguez said that the property owner converted the parking stalls to 30 minutes and has helped the problem.

Chair Lalwani asked if it is easy to get data from the police department to find out the number of accidents in the Calaveras Plaza area. Mr. Rodriguez said that the police does have system that tracks collision and that traffic engineering should have access to that system at by end of the year.
